ColorPave Tint - Gallon	\$ 98.50

NOTE: COLORS WILL VARY SOMEWHAT DUE TO PRINTING LIMITATIONS. ASK US FOR A COLOR CHIP CARD FOR A MORE ACCURATE REPRESENTATION.

LITTLE WONDER OPTIMAX BLOWERS

- Advanced impeller and aerodynamic design
- Unique split-stream air deflector moves debris farther and faster; without blow-back
- Continuously welded all-steel impeller and housing for strength and durability you can rely on season after season
- Remove discharge chute control on the handle at your fingertips

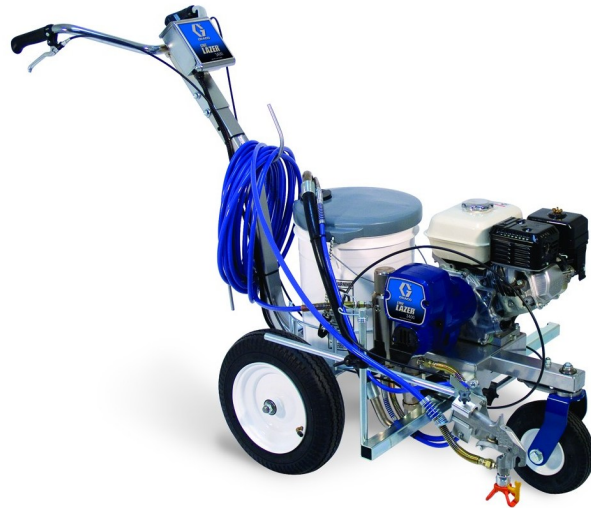

LITTLE WONDER EDGER

- Dual Belt Drive
- Dual Front Fixed Wheels
- Height adjustment system
- Full axles - front & rear
- Non-slip drive belts
- Edging depth: up to 4"

GRACO LINELAZER 3400 AIRLESS LINE STRIPER

- Operator controls are located right at the handle bars – fine-tune the striper's operation without stopping production!
- Swivel front wheel makes striping up to the curb easier. Stripe arcs and curves with ease.
- Electronic pressure control provides excellent line quality.

STRIPE TRAFFIC MACHINE

This easy-to-use machine applies crisp, even 2" to 4" lines to concrete or asphalt.
(Paint sold separately)

SALE PRICE:
\$ 14.50

DUST CONTROL SERVICES

SOIL STABILIZATION

Ultra Bond 2000 is a specially engineered formulation of water based emulsified resin designed for use as a dust suppressant for soil stabilization. Ultra Bond 2000 is a light brown colored liquid with no objectionable odor. Under PennDot regulation, Ultra Bond is not classified as a hazardous substance. The emulsion is water-based, and therefore possesses little in the way of fire hazards. Ultra Bond 2000 is a non-placarded material for transportation which has received approval for the use on the Commonwealth of Pennsylvania roads.

PA STATE CONSERVATION COMMISSION APPROVED

- **Consolidates the Road Surface**
- **Reduces Loss of Road Material**
- **Lengthens Maintenance Intervals**

HOW SEALER DROP TANKS IMPROVE PRODUCTION & PROFITABILITY

*The economics of sealcoating dictate that the **more sealer than can be put down in the shortest amount of time results in the biggest impact to a contractor's bottom line.** So, it stands to reason that contractors should do what they can to shorten the length of time their crew is working on a project. One relatively easy way is to use a drop tank on appropriate jobs. It is this reason why Dixon Sealer decided to offer drop tanks to our customers. We continue to expand our fleet to keep up with our customers' demand.*

Drop tanks virtually eliminate downtime for crews while they're waiting for someone to drive to the supplier to pick up a load of sealer. There is additional freight of hauling the tank in, but that additional cost is outweighed by the labor hours saved on the job.

DIXON SEALER'S DROP TANKS AVAILABLE: (5) 2,000 GAL TANKS & (4) 3,000 GAL TANKS

- TANKER TIP #1:** FOLLOW ALL OF THE SUPPLIER'S INSTRUCTIONS AND CALL IF YOU HAVE A QUESTION. **DON'T GUESS, BE SURE.**
- TANKER TIP #2:** PUT THE TANK IN THE RIGHT SPOT. AS A GENERAL RULE, PLACE THE TANK IN A CORNER OF THE PARKING LOT, AWAY FROM EVERYTHING. KEEP IT WHERE IT'S EASY TO REFILL.
- TANKER TIP #3:** IF YOU ARE WORKING AT NIGHT, MAKE SURE THAT THE TANKER IS PLACED IN AN AREA THAT IS WELL LIT.
- TANKER TIP #4:** MAKE SURE THE TANK IS VENTED AND KNOW HOW TO USE THE VENTS.
- TANKER TIP #5:** HANDLE HOSES PROPERLY. MAKE SURE THE CAPS ARE REMOVED AND THE DISCHARGE HOSE IS IN THE MACHINE BEING FILLED BEFORE TURNING ON THE PUMP. PROPERLY SECURE ALL HOSES WHEN NOT IN USE TO PREVENT TRIPPING ACCIDENTS AND TO KEEP THEM FROM BEING RUN OVER.
- TANKER TIP #6:** CLEAN OUT THE STRAINER BASKET FREQUENTLY.
- TANKER TIP #7:** MATERIAL SHOULD BE AGITATED FOR 10-20 MINUTES BEFORE OFF-LOADING BEGINS. AGITATE AGAIN BRIEFLY BEFORE EACH FILL. THE MATERIAL NEEDS TO BE AGITATED ON OFF DAYS TOO. IF IT'S RAINING AND YOU DON'T WORK ON SITE FOR 3 OR 4 DAYS, ALL OF THOSE SOLIDS SETTLE TO THE BOTTOM.
- TANKER TIP #8:** KEEP TRACK OF THE MATERIAL USED TO MAKE SURE YOU WILL HAVE ENOUGH AND TO GIVE YOUR SUPPLIER ENOUGH NOTICE TO MAKE ADDITIONAL DELIVERIES.

MA10 Melter/Applicator

The **MA10 MELTER/APPLICATOR** is the fastest, most efficient method for hot applied crack sealants. Up to 600 lbs. of sealant can be melted and applied per day by ONE MAN with the MA10. This unit is mounted on steel wheels and comes equipped with spring loaded hand controlled release valve, steel screed for striking off the sealant in uniform width, burner assembly with hose, regulator and temperature gauge, and a platform for propane bottles.

30 GAL & 55 GAL Melters

Provides hot material in 60 minutes or less! Comes equipped with draw-off valve, hand agitator, temperature gauge, hinged lid, lifting handles, burner, hose & regulator.
